Driving to and from work can be one of the most stressful parts of the day, from fighting traffic to dealing with other stressed-out drivers, your daily commute can cause unnecessary tension. Fortunately, the E-Wayfarer electric bike can change the way you view your travel time. Just fold it up quickly and take it into your office with you. It requires minimal storage space. Fold and Unfold in less than 30 seconds.

With top quality electric and bike components the E-Wayfarer is designed to transport you quickly and will get you to your destination with minimal effort.

The E-Wayfarer is powered by a powerful 36 volt/ 10 amp Advanced Lithium Ion Battery. These types of batteries give up to between 800 - 1000 charges and weigh all of 4 kg. When you compare this to a Lead/Acid battery with a weight of 10kg and a charging capacity of between 300 - 400 times you know you're buying a quality product.

When you're speeding along in traffic you want to be sure you have full control of your bike, this is why the E-Wayfarer comes with both Front and Rear V/Servo brake systems. With a Quick shift Seven Speed Shimano gear system you are not limited to the speed of the electric motor. You can experience the best of both worlds, exercise and power assist.

More than just a commuter bike the E-Wayfarer is great for taking with you on the Bus, Taxi, Train, Airplane or Car. It folds up easily and is perfect for the city or suburban commuter.
